Dear Madam, Sir,

The city of Târgu Frumos confirms its commitment to be Project Partner in the activities of the URBACT Action planning network proposal entitled **U.R.Impact: Prioritizing Social Impact in Urban Regeneration** led by MUNICIPALITY OF CINISELLO BALSAMO.

The specific challenge we wish to address in this Action planning network is how to guarantee social inclusion and community development while renovating an urban area and how to measure its impact, to prevent urban/architectural actions from being isolated interventions and instead can be an opportunity to improve the cohesion, well-being and quality of life of a community.

A problem to which the city of Targu Frumos wants to find a solution through this network is that of individual car garages. For over 30 years, the town hall has rented plots of land to citizens to build car garages. Over the years, many garages of this kind have appeared, constructions that no longer comply with the urban planning regulations and that have deteriorated or that no longer comply with the functionality for which they were intended. This was a general problem at the level of Romania, until now only a few large municipalities had the "courage" to terminate the rental contracts and demolish the garages. The biggest problem is the opposition of the citizens, even if in many situations modern parking solutions have been proposed. We want the lands occupied by some degraded and ugly constructions to be transformed into modern and as green spaces as possible.

We are convinced that by working through this URBACT network, we will be able to better address these challenges. In this context, if the proposal is approved within the framework of the URBACT IV Programme, we will participate in the project, take on roles and implement activities as indicated in the application work programme. More especially, we commit to participate in the transnational meetings planned, to contribute to the production of the Network roadmap (Baseline study), to identify key stakeholders to be involved and to contribute to the production of the communication plan.

To this end we also formally commit to engaging the funds needed to co-finance ERDF¹. The details of this contribution are outlined within the application.

¹ For project partners, to be chosen according to the relevant fund concerned.

Yours sincerely²
